

Turn slides into shared questions.

A three-page course for testing the complete classroom workflow.

1

Present

Keep the original PDF in order.

2

Ask

Students question the current page.

3

Discuss

The teacher chooses what to project.

Notice the moment confusion begins.

Every question is linked to the teacher's current page and section.

A Student asks

Use a nickname. Never enter private or patient data.

B Peers vote

One reaction per student keeps shared confusion visible.

C Teacher decides

Questions stay off the projector until selected.

Pause. Choose one. Continue together.

A checkpoint is a teacher decision, never an automatic Agent action.

Teacher checklist

- Review the most-voted questions.
- Project only the question being discussed.
- Return to the handout when the answer is complete.
